

To Whom it May Concern:

Please reconsider allowing cell phones to be used on planes. There is nothing more annoying than having to listen to mindless cellphone chatter. On the ground, a person can take his or her call "outside". At 36,000 feet, this option is not available. Flights are loud enough with movies, jet noise and normal conversation. Adding the constant ringing of cellphones and yammering conversation will make air travel a nightmare.

Thank you for your consideration.
